

# Dedicated Server Hosting

A Dedicated Server can take you to the next level. With our distinct set of servers, each plan is designed to assist you in improving your server efficiency while reducing your total administration costs.

**Canadian Web Hosting offers three levels of dedicated servers: Budget, Managed and Pro. Dedicated Servers provide Enterprise-Grade hardware at a fraction of the cost. Whether you are on a tight budget or investing in an enterprise-class solution, choose the hardware and software configurations that best fit your needs, and we will deliver all the performance you need with the latest generation of Xeon processors with 100% network availability.**

We also offer Tiered Management services from a dedicated team to monitor and mitigate risks to help secure your IT infrastructure including patching, vulnerability updates, log management, server hardening and so much more. With Managed Hosting you can improve the efficiency of your IT systems. Thanks to a flexible server setup and full range of à la carte custom services, you have everything you need for a secure, optimized server.

## Service Comparison

	Cloud Servers	Dedicated Servers
Rapid Deployment	★	
Fully Customizable	★	
Virtualization Ready		★
Dedicated Hardware		★
Supports High I/O		★
